MaxGuard Cleaning Instructions

MaxGuard features built-in soil and stain repellent technology making cleaning easy and since the protection is built into every fiber, it will last the life of the fabric.

The best way to protect fabrics is to remove spills and stains from them as soon as possible. MaxGuard minimizes staining in protected fabrics, but cleaning will still be necessary. Remove spills immediately to make sure there will be minimal to no staining on the fabric.

Please note: MaxGuard stain protection is not an impenetrable moisture barrier and does not provide impermeability to liquids.

While every fabric is different, please refer to our website for general cleaning instructions: www.maxwellfabrics.com/resources

General Spot Cleaning Instructions for MaxGuard:

1. Clean liquid spills quickly with a dry, clean, absorbent cloth (without design or printing). Gently blot (don't rub).
2. If any residual spot remains, remove any excess soil or debris from the surface. Flush area liberally with warm water then blot with a dry, clean absorbent cloth. Repeat steps with a dry clean cloth until the stain is gone.
3. If necessary, prepare a cleaning solution of ¼ cup mild soap such as Woolite®, Dawn® dishwashing liquid or Tide® laundry detergent, per gallon of lukewarm water.
4. Apply the cleaning solution using a misting spray bottle.
5. Work the solution into the affected area by lightly scrubbing the area with a sponge or soft bristle brush. Make sure to work from the outside of the stain inward so as not to spread the stain and rinse your sponge or brush frequently.
6. Allow cleaning solution to soak into the fabric.
7. Rinse thoroughly to remove all soap residues, as residues will attract dirt. Blot excess moisture with a clean, soft towel or sponge.
8. Repeat steps 3-6 as needed.
9. Allow fabric to air dry.
